Lancaster Farming

Vol. 17 No. 14 | Lancaster Farming, Saturday, February 26, 1972 | $2.00 Per Year

Inter-State's Dr. Honan Talks of 'Politics and Milk' or Vice Versa

District 7 of the Inter-State Milk Producers' Cooperative held its annual dinner meeting at Hostetter's Dining Hall, Mount Joy, at noon Thursday.

Election of local officers and a talk by Dr. James E. Honan, Inter-State secretary and general manager, were among the highlights.

Honan zeroed in on several issues facing milk producers including what he described as "prices and politics," something which he said "happens every four years when milk prices get involved in politics and politics get involved im milk."

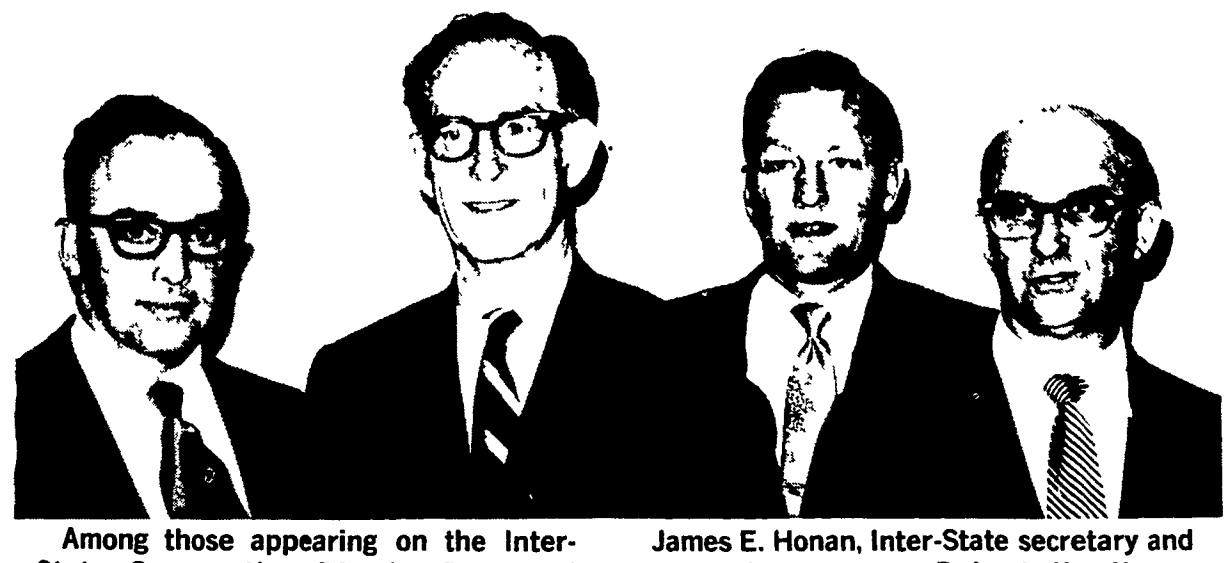
Honan said that in general he sees the recent action to replace the U.S. Secretary of Agriculture as "something that had to be done to move farmers back into the present administration." Honan says he sees a number of things being done to improve U. S. farm prices.

He noted that Senator Hubert Humphrey, presidential candidate, already is recommending price support increases for milk and Honan indicated he thinks the present administration may raise milk prices in the next three or four weeks.

But Honan noted that the interest of consumers is for lower prices.

When federal order four (Philadelphia) is extended to include a larger area and more farmers, prices to farmers in these areas will be increased, resulting in higher prices for consumers. Honan said he

(Continued on Page 20)



Among those appearing on the Inter-State Cooperative District 7 annual banquet program Thursday afternoon are: Daniel L. Martin, District director; Dr. James E. Honan, Inter-State secretary and general manager; Robert Kauffman, District president and banquet toastmaster, and Andrew A. Marvin, fieldman.

Jersey Calf Sale Set

A Jersey calf sale to benefit 4-H and FFA work and sponsored by the Pennsylvania Jersey Breeders will be held at 10:30 a.m. Saturday, April 1 at Top-O-Hill Farm, the home of the George Seeds family, Downingtown.

In conjunction with the regular Pennsylvania State Jersey meeting, the sale will be the first of its kind in the history of the Jersey Association in Pennsylvania.

Donald Koontz of Walabe Farm is chairman of the sale. Jim Boswell of Unionville will be donating his time as auctioneer.

The calves are from dams with 10,000 pounds of milk or more and are from proven sires.

Also included in the Saturday morning activities will be a tour of the New Bolton Center.

Anyone desiring reservations for the Saturday, April 1 banquet, contact George A. or Mildred Seeds, 1208 Seeds Lane, Downingtown, 19335, or call 215-269-0759 no later than March 20.

But All Farm Equipment Needs Emblem

Buggies Exempt From SMV Law

Pennsylvania State Police this week reported that the new slow moving vehicle (SMV) law does not apply to Amish buggies.

Previous indications from State Police and other sources were that the law would apply to all vehicles traveling on public roads at speeds less than 25 miles per hour.

But State Police reported this week that the law is being strictly interpreted and that this interpretation excludes Amish buggies.

The law will apply, however, to farm implements and machinery, including those pulled by horses. Present indications are that the law will apply to Amish farm equipment on public highways, but not to the buggies.

Sgt. Donald Hollywood, traffic sergeant at Lancaster Police barracks, explained this week that the official state slow moving vehicle emblem is required on "all farm machinery, implements of husbandry, including all road construction and maintenance machinery designed to operate at 25 miles per hour or less traveling on a public highway, day or night."

Hollywood said, "The legislature did not include (in the SMV law) the horse and buggy being used by the Amish sect."

He noted that local State Police checked with the traffic Bureau in Harrisburg and "they confirmed it is not required on the Amish buggy." But Hollywood added that farm machinery pulled by horses will be subject to the law, which required the official triangular slow moving vehicle emblem.

Previous reports in Lancaster Farming had indicated that the emblem would be required on all vehicles traveling under 25 miles per hour, including the buggy.

Hollywood said his office has recieved numerous inquiries in recent weeks in regard to application of the law to buggies. He acknowledged there was some uncertainty initially on whether the law would apply to buggies, but this has been resolved to exclude buggies.

The law requires that the emblem be positioned as near as practical to the center of the machinery. The emblem is not required on vehicles being towed if the towing vehicle has an emblem which is readily visible.

Hollywood also noted he has received some inquiries on how the law would apply if an emblem is on a vehicle which is being transported by a fast moving vehicle which exceeds the 25 mile per hour limit. Hollywood said that as far as he can tell there is nothing in the law to prohibit the transported vehicle from having the emblem, but he advised that as a practical matter the emblem should be covered in such cases

New Egg Act Will Force Down Breakage, Birth Says

The "main good" to come from new federal egg inspection regulations effective July 1 will be "to force farmers to reduce breakage" Kermit Birth, Penn State poultry marketing specialist, told local farmers Thursday night at the Farm and Home Center.

Birth said he has seen some instances of breakage exceeding 13 per cent and even much higher. But he stated there's "absolutely no excuse for it." Birth showed slides and discussed numerous causes of breakage, nearly all of them involving improper handling of eggs or birds.

According to Birth, "Some farmers who say they can't afford to spend more money to stop breakage may not have spent enough time pushing the pencil" to see how much breakage is costing them.

Other discussion at the second of three Lancaster County Poultry Association education meetings at the Farm and Home Center revealed that it will be illegal to "sell inedibles" after Phase II of the new Federal Egg Products Inspection Act becomes effective July 1.

When farmers inquired if this will outlaw selling of a few eggs at their farms to neighbors and others who stop by, officials explained that it will be illegal to sell inedibles and that it will be impossible to know if the eggs contain inedibles unless they are candled.

Some farmers indicated they currently sell a few eggs without candling and that this would mean purchase of candling equipment will be necessary.

In other discussion, it was indicated that responsibility for egg quality, except for farmer sales directly to the customer, will rest primarily with the processors and retailers.

Further educational meetings are expected on the Egg Products Act to further familiarize producers and processers with details of the new law. One such meeting has been scheduled by the USDA in Harrisburg on March 10.

Also speaking were E. J. Lawless, Pennsylvania Department of Agriculture chief of poultry and eggs division, and Richard Shockley, USDA. The meeting was chaired by Jay W Irwin, associate Lancaster County ag agent.

Railroad Accepts Stock Yards Bid

A high bid submitted by the Lancaster Livestock Exchange has been accepted tentatively by the management of the Penn Central Railroad for sale of Lancaster Union Stock Yards.

A second bid of Bunarco Inc. for purchase of a 5.1 acre tract across Marshall Avenue from the stock yards, was also accepted.

The Exchange bid $803,331 for the 22.9 acre stock yard site, which includes cattle pens as well as the Stock Yard Inn, at the corner of Lititz Pike and Marshall Ave.

Because Penn Central is operating under bankruptcy proceedings, the bids must now go through a complicated legal procedure before sale of the stock yards is finalized.

Farm Calendar

Monday, February 28

7:30 p.m. — Waste Disposal meeting, Farm and Home Center.

Farmers Union National Convention, Houston, Texas, February 28 - March 2.

Fulton Grange 66 meeting, Oakryn.

Waste Meeting Set

Livestock waste disposal will be the topic at an educational meeting at the Farm and Home Center at 7:30 p.m. Monday, February 28.

A. Roger Grout, Penn State ag Extension engineer, will speak on "Manure Management and Disposal" and N. Henry Wooding, Penn State ag Extension engineer, will discuss "Liquid Waste Management."

In urging farmers to attend the meeting, Max Smith, Lancaster County ag agent, noted changing agricultural methods, growing pressures on farmers and the need to "become as knowledgable as possible in livestock waste management in order to maintain good community relations."

CATTLE — Slaughter Steers 25-75 higher, Cows 50-1.00 higher, some sales 1.50-higher than last week's close; Bulls strong to 50 higher, instances 1.00 higher. Supply included an estimated 50 percent Slaughter Steers, 35 percent Cows and Bulls, with the balance mainly Feeder Steers.

SLAUGHTER STEERS — High-Choice and Prime 1100-1425 lbs 37.35-39.00; Choice 950-1425 lbs. 35.50-37.60, mostly 36.00-37 25; high-Good and low-Choice 34 25-36.50; Good 31.50-35.50; Standard and low-Good 27.50-31.75.

SLAUGHTER HEIFERS — Choice 790-1180 lbs. 34.25-36.35, couple 36.85-37.00; Good 30.00-31.75.

COWS — Utility and high-dressing Cutter 25.60-27.85, few 28.00-29.00; Cutter 23.50-26.50; Canner and low Cutter 21.75-24.50.

BULLS — Choice 33.00-34.75, few 34.75-35.85; Good 29.75-33.00; Utility and Commercial 29.50-32.60, few 32.75-33.50.

VEAL CALVES — Vealers uneven, steady to weak, instances 1.00 lower, with some sales of Choice and Prime at mid-week as much a 4.00 lower.

VEALERS — Prime 60.00-65.00, few 66.00-67.50; Choice 58.00-63.00; Good 48.00-55.00; Standard 40.00-49.00; Utility 90-120 lbs. 33.00-40.00.

RETURNED TO FARM — Bulk 90-120 lbs. 49.00-57.00, few Holstein Heifers 58.00-63.50.

Local Grain

Thursday, February 24

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, February 24, 1972, are as follows:

	Bid+	Offered+
Ear Corn	39.00	46.00
Shelled Corn	1.34	1.49
Oats (local)	.80	.91
Oats (western)	.99	1.10
Barley	1.09	1.30
Wheat	1.43	1.66

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Peoria Cattle

Thursday, February 24

Receipts this week 6400; last week 5900; last year 1500. Trading was very uneven on slaughter steers. Average Choice to Prime grades ended 25-50 higher than the previous weeks close. Below grades were under heavy buying pressure with some sales closing 25-50 lower than last week. Mixed Good to Average Choice short - fed lots encountered the greatest decline. Slaughter heifer prices increased substantially on Monday, but declined 25-50 by mid-week. Despite Wednesday's drop in prices, slaughter heifers still closed 50-75 higher than the previous period. Cows were steady to 50 higher, with Utility and Commercial grades showing the greatest upturn. Bulls ended strong to 50 higher. Supply consisted mainly of High Good to Average Choice slaughter steers and heifers, with several loads Mixed Choice to Prime steers; balance of receipts mainly cows.

Slaughter Steers: Two loads High Choice and Prime 1200-1290 pounds yield grade 3-4, 38.25. Mixed Choice and Prime 1125-1300, 3-4, 37.50-38.00. Choice 950-1300, 2-4, 35.50-37.75. Mixed Good and Choice 850-1175, 34.25-36.00. Some in week, 34.25-35.25. Good 31.25-34.50. Few Holsteins 32.00. Standard and Good Holsteins 30.00-31.00. Standard Holsteins 29.00-30.50.

Slaughter Heifers: Choice 800-1025 pounds yield grade 2-4, 34.50-36.00. Mixed Good and Choice 750-950, 33.25-34.75. Good 30.50-33.50.

Delmarva

BOILERS
Thursday, February 24

Ready-to-cook movement fairly good though occasionally less agressive than expected. Slaughter schedules about steady. Advance interest fair at unchanged levels with this week's levels. Less than trucklot prices unchanged to ½ cents higher on both Plant and U.S. Grade A. Live supplies fully adequate though weights continue to average lower than desired. Undertone steady. Negotiated trucklot prices 2-3 pound ready-to-cook broiler-fryers for delivery next week:

Plant Grade 27½-28 Pool trucklot prices for Friday arrival in the New York area: U.S. Grade A 28½-31½ M 28½-29 Plant Grade 27½-29½ M 27½-28.

Weekly New York Egg Market

(From Monday, February 21st to Friday, February 25th)

	Mon.	Tues.	Wed.	Thurs.	Fri.
WHITE					
Fcy. Ex Large		34½	34½	35	36
Large		33½	33½	34	35
Mediums		28	28	28½	29½
Pullets		25	25	25	25½
Peewees		17	17	17	17
BROWN	HOLIDAY				
Fcy. Large		34	34	34	34
Mediums		Unquoted			
Pullets		Unquoted			
Peewees		Unquoted			
Standards		28	28	28½	29½
Checks		16½	16½	16½	16½

Long Tone - Carton orders reasonably active. Demand at packing plant level good. Offerings generally held with confidence.

New York Eggs

Thursday, February 24

Prices trended fractionally higher on large and mediums. Receipts light from the sale demand just fair on large, irregular on mediums, light on smalls. Supplies fully adequate on fancy large with some good quality being sold as standards due to competition with direct deliveries. Mediums are barely adequate with country point, offerings ample. Cartoning activity fair. Undertone steady.

Eastern Pa. and N.J.

HENS
Wednesday, February 23

Prices continue unchanged on light type hens. Demand fair. Farm offerings generally short of full operating time at most plants however advance offerings for movement near Easter continue to increase. Offerings of local heavy type hens generally short of full needs. Prices paid at farm; Light type hens 5-6¾ M 6½-6¾ in Pa., M 5½-6 in N.J. Heavy type hens 15½-16½.

Omaha Cattle

Thursday, February 24

Compared with last weeks close closing prices on slaughter steers were 25-50c higher and heifers strong to 25c higher. Cows closed 25-50c lower. Bulls fully steady. Feeders fully steady, instances 25c higher early on fleshy two-way steers.

Four day receipts 19,800 as compared 18,600 previous week and 15,200 a year ago, when marketings were disrupted by blizzard conditions. Slaughter Steers approximately 39 per cent, heifers 38 per cent, fairly liberal percentage Choice but High-Choice and Prime limited. Cows 10 per cent, feeders 10 per cent. Fed cattle trade followed irregular course. Prices advanced sharply on modest Monday supply but part of early advance lost at midweek as carcass prices again pointed downward. Most slaughterers entered week with fair inventory of live cattle and urgency of demand further diminished by a non-slaughter holiday in most Omaha area plants on Monday.

Average cost slaughter steers first three days 35.93 average weight 1118 pounds as compared 35.50 and 1118 pounds previous week and 31.66 and 1141 pounds a year ago.

Market Steers

Steers — Load High Choice and Prime U.S. 3-4, 1139 pounds, 37.50; 1076 - 1360, 36.75 - 37.25; Choice 2-4 975 - 1250, 35.75 - 36.50; Mixed Good and Choice, 950 - 1225, 35.25 - 36.00; Good 32.00 - 35.25; Holsteins 2-3, 1150 - 1568, 32.00 - 32.50; Standard and Low-Good, 30.50 - 32.00.

Heifers — Five loads U.S. 3-4 890 - 1069 pounds, 36.35 - 36.50; 900 - 1050, 36.00 - 36.25; Choice 2-4 825 - 1025, 34.75 - 35.75; Mixed Good and Choice 800 - 975, 34.00 - 35.00; Good, 29.00 - 33.75; Standard and Low-Good, 27.00 - 29.00.

Cows — Utility and Commercial, 22.50 - 24.00; Utility Dairybreds, 24.25 - 24.50; Canner and Cutter, 19.50 - 23.00; Mixed Cutter and Utility, 23.25 - 23.50.

Bulls — Utility, Commercial and Good, 26.50 - 29.00; Commercial, 29.50 - 30.00; Cutter and Low-Utility, 24.50 - 26.50.

Feeder Steers

Outshipments approximately 2,000 head as compared 1,500 previous week. Demand Good early with prices strong to 50c higher, advance on High-Good and Choice fleshy two-way steers.

Steers — High Good and Choice 800 - 1098 pounds, 35.00 - 37.00; Standard and Good Holsteins 850 - 1022, 31.50.

Heifers — Load Choice 475 pounds, 37.70; 504 - 545, 36.00 - 36.50; High-Good and Choice, 825 - 890, 32.50 - 33.50.

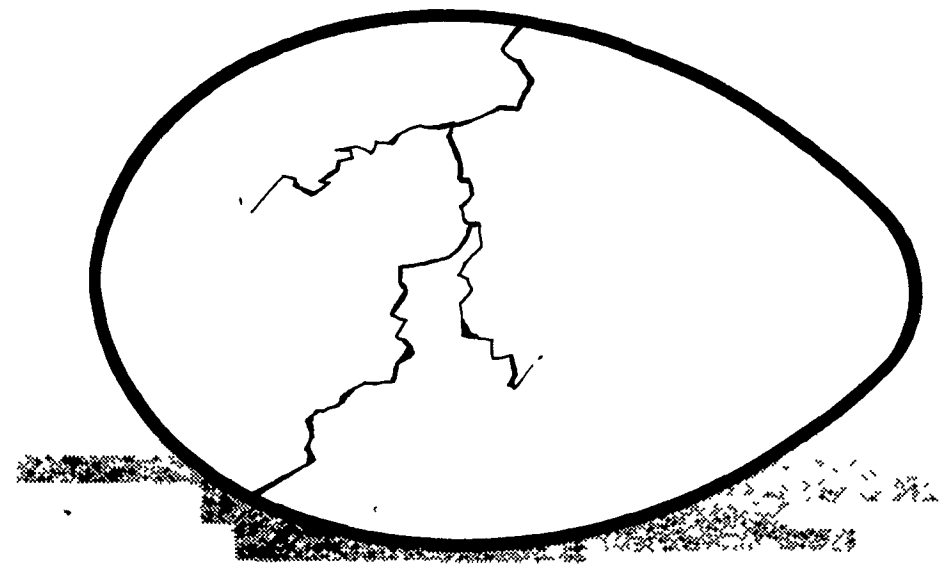
THIS LITTLE EGG GOT TO MARKET



THIS LITTLE EGG STAYED HOME

One little egg made a profit the other little egg made none.

Cracked and broken eggs don't get to market . . . don't make you a profit. And that's why Pennfield has improved all its Mash Layer Feeds to include a shell toughener.

Test work at the Pennfield Layer Research House has resulted in improved egg shell quality. This is achieved by a calcium-yielding additive that is digested slowly and works round the clock to maintain optimum calcium balance and shell toughness.

Call Pennfield today and find out about all five new, improved Mash Layer Feeds. They have all the properties needed for top production .. and are now formulated so you can get even more of that production to market

UEP Discusses Need for Egg Act

"Many people are somewhat confused about the pending legislation, the Egg Industry Adjustment Act, which would enable egg producers to equitably adjust egg production in the United States," according to Dr. Gene C. Masters, general manager of United Egg Producers

"UEP members have indicated through a nationwide survey that they favor industry controls over government controls," Dr. Masters said, "and the Egg Industry Adjustment Act, which will soon be reviewed by committees in both the Senate and House of Representatives, is an equitable industry control measure. The bill would enable the industry to set up a board of egg producers to devise an adjustment plan which might be used to meet a given emergency condition"

There are several points to consider concerning the powers of the industry board and the relative powers of the Secretary of Agriculture, he continued. Theses points are:

1 The 15-man board of egg producers would be appointed by the Secretary of Agriculture from names submitted by egg industry organizations. Thus, the Secretary could not appoint any individual to the board other than egg producers recommended by other egg producers

2 The board would have a power to decide on the form of any specific adjustment plan within the restrictions of the law This means that the Secretary could not write an adjustment plan under the Egg Industry Adjustment Act, only industry representatives could do that The Secretary does have the authority to veto any plan which he considers unrealistic or undesirable.

3 This is emergency legislation to be used under emergency conditions The bill is written so that it will expire in two years' time, thus any form of control that industry might want in the future will require new legislation

Another point that has been misunderstood is that some people view the legislation as a guaranteed no loss condition for the egg industry, Dr Masters stated

In reply to this he noted that the egg board could not act until industry had been, on the average, losing money for at least three months, and there is no guarantee that the industry board would suggest revisions in supply even at that time This would be a judgement made by the egg producer board and concurred in by the Secretary of Agriculture before any adjustment could be put into effect

"I do not anticipate that adjusting prices in times of serious loss will cause the producer price to average higher over a long period of time," Dr Master said. "It will more likely cause prices to fluctuate close to the cost of production without the long periods of seriously depressed prices such as we now have which drive production units out of business"

"In summary," Dr. Masters stated, "the present Egg Industry Adjustment Act would appear to me to be an industry designed plan subject to the approval and enforcement of the Department of Agriculture. The advanatages of such a plan over voluntary programs such as "Action Now" is that the adjustment in production would be more equitable because all producers, other than extremely small producers which would be exempt, would be required to participate in the adjustment.

"I believe that the bill, as written, would allow a maximum of free enterprise competition because no quotas are established and there is no restriction on production other than during the time period when the adjustment is being made," Dr. Masters said.

"A minor adjustment when a large segment of the industry faces bankruptcy could prevent the industry from getting into such a desperate condition that more rigid, federally dominated controls would be sought. Thus, in the interest of free enterprise and to increase the egg industry control over its own destiny, I think the industry needs the Egg Industry Adjustment Act, and needs it quickly."

State Okays $1 Million Waste Treatment Plant at Victor Weaver's

Victor F. Weaver, Inc. and Subsidiaries have received permission from the Pennsylvania Department of Environmental Resources to proceed with the construction of a tertiary water treatment facility, along with authorization to treat and discharge industrial wastes.

The permit received by Weaver is the final step toward the completion of a total water treatment facility, designed to handle exclusively the company's industrial wastes.

The project started in the fall of 1970 with the upgrading of the company's pre-treatment facilities.

In early spring 1971 a treatment building was constructed along South Custer Avenue to house additional equipment, holding tanks, and screening devises, in order to throughly screen out as much wastes as possible prior to entering the New Holland Borough's overburdened water treatment facility for final purification.

Last summer, Weaver applied to the state for a permit to completely treat all its industrial wastes and discharge directly into a tributary of Mill Creek.

Architects for Weaver are presently designing the construction of the additional facilities to house the tertiary equipment. Upon completion, the facilities will be capable of handling one and a half million gallons of waste water daily twice the amount presently being discharged daily by Weaver. The entire project will cost approximately $1 million.

The completion of the project, slated for the end of this year, will enable the New Holland Brough System to operate at a more efficient rate, without the immediate need to build a new facility.

Water discharged by the Weaver facility into a tributary of Mill creek will be pure enough for all ecological standards and the existance of wildlife.

Estey Named to Weaver, Inc. Board

John S. Estey, Esq., Philadelphia, has been named to the Board of Directors of Victor F Weaver, Inc. and subsidiaries, New Holland, it was announced recently by company officials.

Estey is a 1947 graduate of Haverford College, where he received a Bachelor of Arts degree in English. In 1950 he received his law degree from the Yale Law School.

After serving two years in the United States Navy in the South Pacific, Estey joined the Philadelphia law firm of Montgomery, McKracken, Wallker, and Rhoads in 1954 as an associate, specializing in corporate and commercial law. In 1960 he became a partner in the law firm.

A native of Lancaster County, Estey's family operated an egg production business of 4,000 layers, located near Ephrata. Although Estey, his wife Margaret, and their three children reside in Philadelphia, the family farm is still maintained.

In joining the Board of Directors at Weaver, Estey will provide general legal counsel for the entire corporation.

Fix-It Tip

Learn some elementary plumbing. Otherwise, you will find yourself paying a high minimum service charge to a plumber to replace a five-cent washer or fix a drain you could have cleared yourself in two minutes. You'll need only a few simple tools, such as a medium-sized monkey wrench, a screwdriver, a pair of pliers, a spring-steel plumber's "snake" and a "plumber's helper"—a rubber suction cup fitted to a wooden handle

Pennfield Makes Three Key Egg Division Appointments

Donald E. Horn, general manager of Pennfield Corporation's Egg Division, announces three key managerial appointments effective immediately.

Glenn H. Herr has been named production manager for the entire Egg Division. In his position, he will be responsible for the three company-owned egg producing farms, as well as the contract farms.

Prior to his promotion to the Egg Division, Herr was associated with the company's Feed Division.

Ray W. Sheaffer Sr will be processing manager, responsible for operating the company's two packing plants, as well as for egg deliveries to customers and the trucking of eggs from producing flocks to the Ephrata Plant.

Sheaffer will also concentrate on developing marketing and processing services for independent egg producers who are customers of Pennfield's Feed Division.

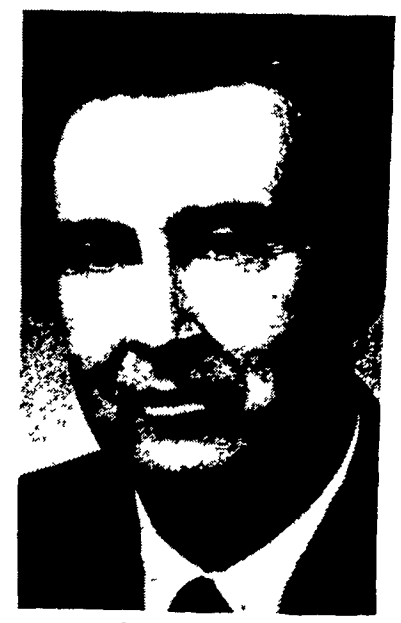
Ray Sheaffer was the owner of L. M. Sheaffer Company, prior to its acquisition by Pennfield Corporation. He and his family reside in Ephrata.

William M. Nies, formerly of the accounting department of Pennfield Corporation, has been named by Horn as the controller of Pennfield's Egg Division. He will be responsible for formulating divisional financial policies, as well as interpreting, evaluating and appraising the Division's financial and accounting procedures for management. Nies and his family reside in Lancaster.

"There three key changes," said Horn, "are part of Pennfield's overall consolidation program." Pennfield Corporation was established in March, 1971 with the merber of Miller & Bushong of Lancaster and D. E. Horn & Co. of York. All three positions will report to Donald E. Horn.

Ray W. Sheaffer Sr
Egg Processing Manager

William M. Nies
Pennfield Egg Controller



Glenn H. Herr
Egg Production Manager

Pa. Milk Marketing—More of Same

Recent statements by Harry E. Kapleau, successor to Lin Huber as chairman of the Pennsylvania Milk Marketing Board have received enthusiastic endorsement by some of the urban press We suggest Kapleau's comments deserve praise by those who would like to see lower milk prices

We also suggest that Kapleau's comments should cause farmers to continue to view the recent changes in state milk marketing with deep concern

In particular, Kapleau announced "reforms" in Milk Marketing Board procedures While some of these reforms may be sound, we suggest that the overall impact will be, at worst, to force milk prices down, or, at best, to keep milk prices stable resulting in growing pressures on farmers as costs continue to rise

One daily newspaper commented editorially on Kapleau's new policies as follows

Both dealers and farmers will be asked to justify with audited figures any requests for price increases. The report declared that in the past "too much unaudited data, particularly the revenues and expenses of dealers were accepted by the Board and put into the record." In the future, Kapleau said, "the auditing and investigative staff of the board will be utilized to the fullest extent in the verification of all financial data." And this will include not only the data on dealers' costs, but cost of production data from farmers, as well as other factors such as market supply, competitive prices in and outside the state. All "will be considered and verified by this Board," Kapleau said.

We suggest that neither dealers nor farmers will be willing to submit detailed audited figures asking for price increases—whether or not those increases are justifiable—to a state administration which has already committed itself to the proposition that lower milk prices are sound and essential.

Asking for milk price increases is a burdensome task under the most favorable circumstances.

Asking for them with the certain knowledge that the facts and figures presented will be used against you—that doesn't make any sense, does it?

Pa. Ag Community Concerns Grow

Concern within the farm community about Pennsylvania Secretary of Agriculture James McHale started almost from the time of his appointment

Lately, growing numbers of influential farmers representing the most outstanding farm organizations in the state are speaking out openly against McHale and his programs and policies

The open break with McHale stems from many causes, the break is deeply felt within the farm community; it comes only after repeated indications by McHale that he does not and will not represent most Pennsylvania farmers and their organizations

The key Pennsylvania farm issues during the past year spell out the situation These issues have included milk marketing, Farm Show, ag reaserch funds, Penn State University Extension — more and more farm leaders are saying that these are only the most obvious and most important programs endangered by McHale.

Our experience is that Pennsylvania farmers in general have a live and let live attitude They'd rather bend a little than get bogged down in a fight, particularly a fight within the farm community itself

But the feeling is growing that McHale leaves only two alternatives fight or surrender He has repeatedly demonstrated that he will not compromise, will not attempt to represent all of Pennsylvania farming

Finally, realizing that McHale is a man who can be neither worked with nor ignored, growing numbers of farmers and their organizations are preparing for battle

Pennsylvania farmers have not felt for many years that they're getting a square deal in Harrisburg For years, they've been fighting a losing battle with higher taxes and a smaller share of state spending.

But no matter how small their share of state monies, farmers have always felt they had a spokesman in the Pennsylvania Department of Agriculture who could save them on the really crucial issues

Now, that voice is gone.

And it's causing a mighty uproar.

So far, most groups outside the farm community itself have failed to acknowledge the intensity of the farm community's concern. And the determination of farmers to be heard has not yet been fully appreciated in the right places.

But the message is coming through loud and clear to those who are taking the time to listen

And to those who can't or won't listen, we predict the message will get much louder

The Mountain and the Mole Hill

Political hassling this week gives an indication of how farmers currently rate in Harrisburg

While debate was proceeding on whether to lower taxes or simply find new ways to spend an estimated $250,000,000 of surplus monies—that is, monies which are lying around after all budgeted expenses have been met.

Meanwhile, the $400,000 of harness racing monies which go to Pennsylvania ag research, local farm fairs and many other important farm projects was being diverted by the Pennsylvania Department of Agriculture into rural non-farm programs.

While Harrisburg wallows in money, Pennsylvania farmers are mounting a major campaign to keep themselves from losing the pittance they now get.

To put it in perspective, the entire $400,000 of harness racing monies which go to farmers and farm programs in relation to the $250,000,000 surplus is a ratio of $1 to each $625.

Since when has the farmer been worth so little on the Hill?

To Plan Your Estate

Everyone should give some thought to the settling of his estate, regardless of the size of his holdings and possessions. The common practice is to keep putting this decision off until something happens. We urge all farmers and all citizens to protect their families by making a will and have some definite plans in writing as to how their life's wealth is to be handled. For a number of years our Extension Service has held educational meetings on this subject and another one is scheduled for Thursday evening, March 2, in the Farm and Home Center. The general public is welcome to attend.

To Select Proper Varieties

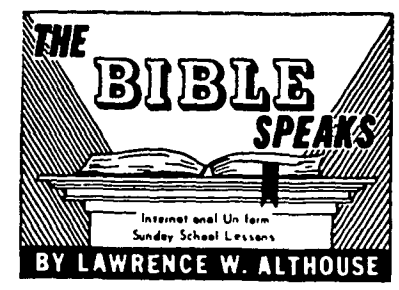
The 1972 planting season is approaching and many purchases of farm and garden seeds are being made; the ideal of planting different varieties of field crops such as alfalfa and corn is a good one and several speakers at recent meetings advised this practice. If a large acreage of one variety ripens at one time, it is difficult to get it harvested or picked at the proper stage of maturity or moisture content. This often happens with hay crops and in recent years with corn that is to be made into hi-moisture corn for feeding purposes. Stage of maturity is very important to get the most feed value and should be staggered by planting several adapted varieties. Consulting with your local seed dealer will help accomplish this practice.

To Manage Livestock Wastes

The handling of barnyard manure is becoming more of a problem in many areas; it is a valuable farm fertilizer and deserves good handling; at the same time it is the subject of considerable controversy relating to both water and air pollution. We urge livestock producers to learn as much as possible about the way to manage manure, about the regulations in the community in regards to environment, and to make a special effort to get along with nearby neighbors. The practice of storing the waste for several months at a time and then spreading it just prior to plowing or working it into the soil is a good one, but does not suit on many farms because of the lack of storage space. Farmers are urged to become interested in community regulations and state laws that may be too restrictive in the practical handling of farm manure.

To Beware of High Machinery Overhead

At a recent meeting of our cattle feeders Fred Hughes of our Penn State Farm Management Section reminded our farmers of the danger of getting too much overhead for the cattle to pay for. Since our farms are small in size, it is very easy to get a high machinery investment that makes it difficult to justify the ownership of some of the larger, more expensive machines; he referred to large tractors, combines, and crop harvesters. In many cases it would be more efficient to use custom operators or have joint ownership of the more expensive machinery. Good farms records will reveal the overhead load and the cost per unit of production.



A LIFE AFTER BIRTH

Lesson for February 27, 1972

Background Scripture: Luke 24 1-49.
Devotional Reading: 1 John 1 1-7.

In Lloyd Douglas' novel, THE GREEN LIGHT, one of his characters muses on the universal desire and belief in immortality. Most people, he notes, think of it only in terms of a "consciousness after death." "Only a few, comparatively," he says, "make use of the immortality concept as a practical measure available here and now . . . Whatever may be the value of it elsewhere, in some other pattern of life, its chief benefit accrues to us in our daily living."

Rev. Althouse

No "cop-out"!

Karl Marx called religion "the opiate of the people." He believed that religion was used so that people, looking to the eventual bliss of heaven, would placidly accept the injustices of life on earth. For him, religion was, in the terms of today, a "cop-out."

What Marx and so many other have missed, however, is that one of the greatest benefits of the Christian belief in the ressurrection of Christ is what that belief inspires people to do in the here and now of life. What we believe about eternal life has tremendous effect in the way we live our daily lives The resurrection of Jesus Christ speaks to us, not only of a life beyond death, but a life after birth as well.

Sophie Tucker, the singer, once said in tribute of songwriter Irving Berlin: "What a wonderful feeling it must be to know while you're still alive that you're immortal!" Actually, her statement had a deeper significance than she may have realized, because this is precisely what the resurrection faith means to us: that while we are still alive here on earth, we know we are immortal And because we know we are immortal, we can live without the fear of death As the writer of Hebrews puts it, Christ came to "deliver all those who through the fear of death were subject to lifelong bondage."

Linked with a living Lord

When Jesus walked with the two disciples on the Emmaus road, what he gave them was not a doctrine of immortality, but a living Presence. This is also what the resurrection means to German theologian Helmut Thielecke " . . . this story is no longer a museum piece At a single stroke it has altered my own life For in such circumstances Jesus Christ is a living Lord with whom I may be linked at any moment, who now speaks to me and to whom I may speak . . "

That is the beauty of the resurrection It assures me of eternity and thus frees me to fully invest myself—all that I have and am—in the present. I don't have to be afraid to spend myself for I am linked with a living Lord who promises me the fullness of life, after both death and birth.

BANVEL® AVAILABLE AT

P. L. ROHRER & BRO., INC.

Smoketown, Pa. **Ph. 397-3539**

Tree Acreage

At the time of the landing of the Pilgrims, there were 937 million acres of superb virgin forest in what is now the United States. That acreage included all territory except the Great Plains and some western desert areas.

Do you know how much chicken consensed chicken soup must contain? Or how much beef the law says corned beef hash must have in it? You can readily find the answers to these questions - and to a lot of other questions regarding meat and poultry and meat and poultry products - in five handy booklets issued by the U. S. Department of Agriculture's Consumer and Marketing Service. For a free set of the "Meat and Poultry Five," drop a postcard to: Information Division, C&MS, U.S. Department of Agriculture, 26 Federal Plaza (Rm 1653), New York, NY 10007.

SMARTWEED?

PIGWEED?

MORNING GLORY?

THISTLE?

BANVEL® Herbicide

POST-EMERGENCE APPLICATION IN FIELD CORN GETS TO THE ROOT OF YOUR TOUGH BROADLEAF WEED PROBLEM

Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to $1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.

PEMA Discusses Phase II of Egg Products Act

At the recent meeting of the Pennsylvania Egg Marketing Association, Bob Shelly reported that Phase II of the Egg Products Act goes into effect July 1, 1972. This will involve four inspections annually and a determination of the manner in which restricted eggs, checks, dirties, leakers, and losses must be handled.

Shelly also stated that U. S. Standards must be adopted where eggs in interstate commerce are involved. "There are a couple of minor changes in quality, but some rather major changes in sizes."

The industry will be informed regarding new standards prior to July 1, 1972

A discussion regarding Phase II brought out the fact that a general meeting to inform Pennsylvania industrymen, as well as those in neighboring states should be held soon.

(Since the PEMA meeting, arrangements have been made with Washington, D. C., for accommodations for a meeting place. The meeting will be held in the Agricultural Building, Room 309, 2301 North Cameron Street Harrisburg, on Friday, March 10, starting at 1 p.m.)

President Landis named a Program Committee which includes Russel Knorr, Ben Brukholder and Raymond Sauder.

Following a discussion, it was decided that after the March meeting at the Sheraton, Lancaster, all meetings will be held in that general vicinity and none in the Harrisburg area.

Toni Stemberger noted, "The foremost question today is how to get the egg business back on a profitable basis. Any voluntary program of adjustment does not seem to work. The Agriculture Act of 1937, which has enabling Legislation and self help marketing agreements on orders is under USDA supervision. Marketing orders may bring money for promotions.

"Actually, the Egg Industry should have some kind of special legislation that will bring about desired results, and be supported by the industry unanimously.

"Presently the more recent Fowl Adjustment Act is in both branches of Congress. No one seems to be sure what is in the Act now and it is a fact that everyone in the industry is not in total agreement. This act, to last for only two years, would call for sale of fowl when pricing fell below costs of production. It has been established that when volume of eggs is reduced by one per cent the value of eggs go up three per cent.

"There are just too many eggs and consumers do not respond to low prices. There are one million farms producing eggs with 100,000 of them very large. Exports are nil so this does not hlep.

"On quotas the small disappear and the large get larger because quotas are sold to large ones and the situation would drive small producers out of business. There could possibly be a quota system where chickens must remain on location or where quotas could be retained by states."

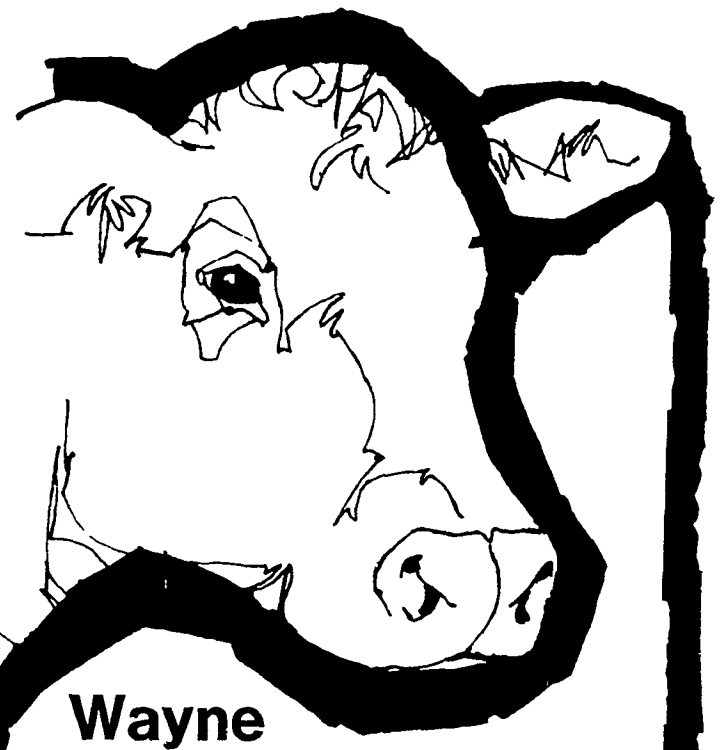
During a general discussion, a number of matters were discussed as follows:

It is predicted that the corporate farm will not drive the small independent out of business. We will probably have 10, 15, and 20 thousand bird flocks, as well as some smaller flocks for a long time because of their variety sales.

A program which would embrace a guaranteed return would not work because there would always by extreme pressure for expansion.

It will require a couple of years to get used to vaccination for Marek's Disease, which is increasing production, and plan on a cutback of poultry population.

(Continued on Page 13)



Wayne Sweet Bulky Means More Milk!

Let's face it Milk cow rations aren't always the most appetizing Even though properly supplemented nutritionally, the ingredients are concentrated to get profitable milk production Boost milk output, pep up appetites, add variety and tempting tastiness with Wayne Sweet Bulky. Sweet with molasses, bulky with beet pulp, it's fed mixed, top-fed or straight (for cows on high-quality, high-protein legume roughages) *Great* as a dry cow or heifer conditioner Does a good low-cost job when hot weather dulls appetites or pastures dry up

Announcing: a dry "pop-up"! Can cut planting time in half!

ORTHO®

Ortho Unipel STARTER SPECIAL.

A starter? As a "pop-up"? It has to be special.

It is STARTER SPECIAL is a completely unique product. Here's why:

— Physical Uniformity STARTER SPECIAL pellets are made to the same shape and density for maximum consistency and control in application.

— Chemical Uniformity. Each and every STARTER SPECIAL pellet has all three primary nutrients — nitrogen, phosphorus, potassium — chemically homogenized in precisely the most desirable ratio 13-34-10 The nutrients can't separate or segregate during handling as with troublesome, hard-to-regulate "dry blends"

— Double Duty Nutrients STARTER SPECIAL has both quick-acting and long-lasting nitrogen and phosphorus for thorough plant feeding. There is no urea or diammonium phosphate that might endanger the seed through liberation of free ammonia.

Of course, these features also make it highly effective as a banded starter. But, with only slight adaptation of most planters, it can be applied directly with the seed in exacting measurement for safety and maximum response.

With this kind of control, you apply much less material — only 1/3 the amount needed for banding. And the reduced material handling could cut your planting time in half!

So, save time, trouble, and money at planting time. See us soon about applying STARTER SPECIAL this spring as a dry "pop-up".

ASK ABOUT EARLY SEASON DISCOUNT.

PEMA

(Continued from Page 12)

Actually, there was a strong feeling that controls should take place at the major breeding and chick producing centers, but price controls on baby chicks would be essentail.

It was agreed that the industry will get out of this depression sometime, but it will take time adn later there will be another, probably worse and longer.

John Landis presided over his first meeting as president. After welcoming everyone, he called for the treasurer's report which was accepted as presented.

President Landis reported that he had a list of those delinquent in 1972 dues. He held out hopes that those who have not responded thus far will do so before the next meeting because he plans to read the names of those who are still delinquent.

A discussion on the needed funds for Cholesterol Research and the Penn State University Scholarship followed. It was pointed out that $200 was needed in the Cholesterol Fund and $125 in the Scholarship Fund. The following volunteered to contribute for a total of $250: Berenson, Producers Pride, Wenger, Weibley, Landis, Brukholder, Lehman, and Werrin.

The group moved to go ahead with the Association lapel pins.

Meeting adjourned at approximately 10:15 p.m.

E. J. Lawless Jr,
Secretary

Federal Milk Orders Amended

The U. S. Department of Agriculture has amended all federal milk orders except the South Texas order, effective February 1, it was announced recently.

USDA's Consumer and Marketing Service said the amendment would:

(1) Require that the Class I (bottling) prices for each month be announced by the fifth day of the preceding month.

(2) Use the basic Minnesota-Wisconsin manufacturing milk price for the second preceding month, instead of for the immediately preceding month, in computing Class I prices.

C&MS officials said the South Texas order was not included in the present action because of proceedings pending in a U S. District Court, and a further hearing to be held by the Court involving an earlier action to terminate the order.

The amendment was first proposed at a public hearing in Washington December 13. The hearing was held at the request of the Milk Industry Foundation representing handlers doing business under all of the orders. A final decision, subject to approporiate dairy farmer approval, was announced January 25. The amendment was adopted following approval by the required majority of farmers affected by the action.

Copies of the amended order may be obtained from the market administrators of the orders, or from the Dairy Division, Consumer and Marketing Service, U. S. Department of Agriculture, Washington, D. C. 20250.

From Local Ag Teachers:

Thoughts in Passing

Editor's Note: This fifth of many articles in a special column written by various agriculture teachers in our service area explains the role of the newest farm-related courses floriculture and horticulture. This educational series, designed to be of interest to and have educational value for all farm people, offers an opportunity for the farm community to become better acquainted with the teachers and for them to express their own interest in the local agricultural community. By Bill Mitchell

Bill Mitchell
Horticulture Teacher

"Of those students currently in high school, only three out of 10 will go on to academic college-level work One-third of those will drop out before getting a baccalureate degree That means that eight out of 10 present high school students should be getting occupational training of some sort But only about two of those eight students are, in fact, getting such training Consequently, half our high school students, a total of approximately 1,500,000 a year, are being offered what amounts to irrelevant, general educational pap!"

This statement was made by Dr Sidney Marland, United States Commissioner of Education Mr. Marland is referring to the fact that over one half or our students who graduate

For good production next lactation,

FEED PURINA DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed. For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

PURINA CHOWS®

Wouldn't you rather keep your farm in the family than have it sold for taxes?

Planning your estate can help you avoid the unnecessary costs and heavy inheritance taxes that often require selling a farm intended for children and other heirs. But that's just one of the advantages of planning your estate to protect your family's future.

As a typical Lancaster County farmer, you're probably worth more than you realize and it's so important to plan your estate for handling by specialists. At the Friendly First, our trust officers, George Sload and Rick Ashby, are the experts who can help set up your estate for the best interests of you and your family.

Regardless of how little or how much you're worth, you'll get personal interest and plenty of time for discussion with a Friendly First trust officer. You can arrange a meeting at any of our branch offices . . . or even at your home . . . wherever and whenever it's most convenient for you.

Tragic losses can happen without proper estate planning. Don't let them happen to your estate. Call George Sload or Rick Ashby today to arrange a discussion that can be very valuable to you and your family. Call them TODAY at 397-4733.

Put your trust in the hands of the Friendly First.

(Continued from Page 14)

from high school are doing so without the training their need to become productive, working members of our community. He feels there is not nearly enough high school vocational training, training aimed at providing a student with a marketable skill.

The agriculture programs found in many of our local high schools have been meeting Dr. Marland's challenge and, providing their students with vocational training for many years. Previously, this training dealt mainly with farming.

However, in the past few years, you have seen and read of the changes in our traditional farm-oriented agriculture programs to programs emphasizing the total agri-industry.

In recent years, these programs have been further refined to include two more agriculture-related programs. These programs are found in two of our three vocational-technical schools. They are titled horticulture and floriculture.

Many of you are well acquainted with the programs which are being conducted in the agriculture classrooms and shops in the county. However, the terms horticulture and floriculture may be confusing and I feel they deserve an explanation.

Students in the horticulture program deal mainly with the production, use and maintenance of trees and shrubs in the landscape. They are acquiring the skills needed to become productive employees in such areas as nursery industry, the landscaping industry, garden centers and the turfgrass industry with its golf courses, sod nurseries, home lawns, etc.

Students in the floriculture program, on the other hand, through their work in the vocational schools' greenhouse are learning the skills required of an employee in the florist industry. Such occupations as the greenhouse employee and the floral designer are stressed in this program.

As a spokesman for horticulture and floriculture segments of the agriculture industry, I feel, as I know other agriculture instructors do, that we are meeting our goals of equipping our students with the skills they need to gain employment immediately upon graduation from high school.

However, I do not feel that the vocational education of our young people begins and ends in the vocational school or the agriculture department. A student is educated by everyone he or she comes into contact with.

Consequently, I feel additional sources are needed if we are to provide our students with the most comprehensive vocational training they can receive.

Three sources that immediately come to mind are the members of the industry we are preparing employees for, the parents of the students enrolled in our programs, and anyone else who is interested and concerned with the vocational education of our young people.

Referring to the first source, I feel there are several areas where employers can greatly aid our schools in their work.

1. Visit the vocational-technical schools or agriculture departments. Let the instructor know what the needs of the business are. The instructors in these programs must know what is needed in the way of vocational training in order for their programs to be a success.
2. Volunteer your services as guest speakers and the services of your business for field trips.
3. Volunteer to serve as an advisor to these programs as a member of a Craft Committee.
4. Participate in the Co-operative Education Programs of these schools. In this type of program, the employer takes a direct part in the education of the student by hiring that student for a period of time. The student works during his regular school hours and learns first hand what the occupation is like.

In referring to the aid of parents and others concerned with the education of our young people, I feel there are two ways they can help.

1. Visit the vocational-technical schools or the agriculture departments in the high schools. Learn first hand what is being taught in these programs.
2. Participate in open house programs offered by the schools.

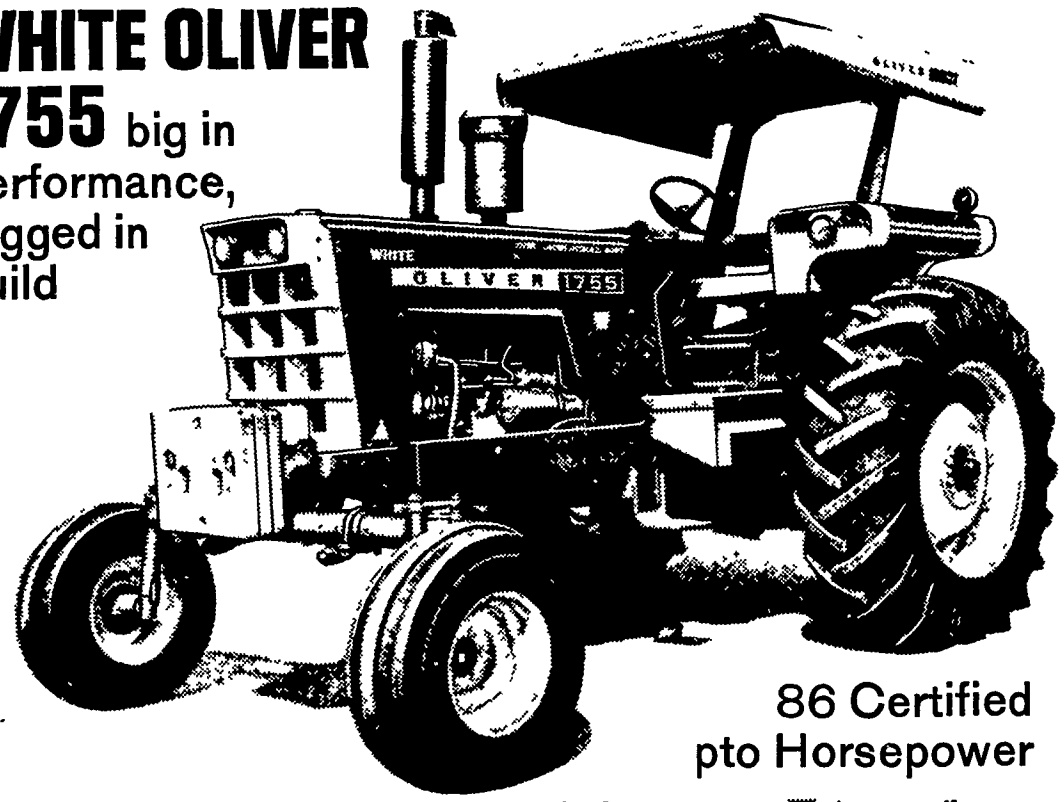
Agriculture has been in the forefront of vocational education in the county for many years and will continue to do so.

However, with the expansion of agriculture from farming to the total agri-industry, I feel, as I know my fellow agriculture instructors will agree, the need for the aid of others in the education of our young people. If more people feel the need to become involved with the education of these young people, then this educational process can only become more valuable and worthwhile.

Prelate's Skull Cap

Zucchetto is the name given to the skull cap worn by Catholic prelates. Rank is distinguished by the color of the zucchetto: The Pope's is white; a cardinal's is red; a bishop's is violet and that of others is black.

WHITE OLIVER 1755 big in performance, rugged in build



86 Certified pto Horsepower

■ More pull than you expect, more strength than you see. ■ A versatile performer offered in Row Crop, 4-Wheel Drive, Wheatland/Ricefield models. ■ Your choice of smooth, 6-cylinder engines—gasoline or diesel. ■ New, closed-center hydraulic system delivers extra "muscle" whenever and wherever you need it, greater lift at low engine speed. ■ New, self-adjusting, double-disc power brakes —smooth hydraulic stopping power. ■ New hydraulic control of pto: "feather" engagement to start loads smoothly, 540 or 1,000 rpm. ■ New wander-free power steering system reduces drift, includes column that tilts to 5 positions. ■ New, isolated, rubber-mounted platform and instrument panel dampens vibrations, reduces heat and noise transmission. ■ Optional Hydraul-Shift with on-the-go underdrive and overdrive offers 3 speeds in each of 6 ranges—18 in all. ■ Extra wheel guard fuel tanks boost capacity to more than 100 gallons (standard 35-gallon tank). ■ Optional cab with air conditioner, Powerjuster rear wheels and dual-flange hubs.

Henry Givler, third from left, area vocational consultant, congratulates William Fisher, newly elected president of the Garden Spot Young Farmers Association at the organization's recent banquet. Givler inducted the new 1972 officers. Shown left to right are: Earl S. Weaver, treasurer; Walter C. Martin, secretary; Givler; Fisher; John J. Landis, vice president; Glenn Hershey, public relations director, and M. Dale Herr, new member-at-large.

Garden Spot Young Farmers Assn. Holds Banquet

The Garden Spot Young Farmers Association held its annual banquet at the Blue Ball Fire Hall last Friday night, February 18.

William Fisher, East Earl RD2, was elected president to succeed Loren Zimmerman. Fisher was vice president during the past year. Also elected were: John J Landis, vice president; Walter C. Martin, secretary, Earl S. Weaver, treasurer; Glenn Hershey, public relations director, and M. Dale Herr, member-at-large.

Henry Givler, area vocational consultant, installed the new officers in special ceremonies.

Larry R. Weaver, New Holland RD1, received the Chapter's Outstanding Young Farmer award. In the Lancaster County competition, Weaver placed second to Clarence Keener, Manheim RD1, who went on to become the Pennsylvania Outstanding Young Farmer.

John Yost, Kinzer RD1, received the high DHIA member award. His herd average was 15,393 pounds of milk and 656 pounds of butterfat.

Yost was previously recognized at the annual Lancaster County DHIA banquet for having the third highest county average in 1971.

Earl Weaver, New Holland RD1, received the first place award in the corn grain evaluation contest. Weaver produced 187 bushels per acre.

He was followed closely by Frank Yost, Narvon RD2, with 185 bushels and Glenn Hershey, New Holland RD2, with 184 bushels. Hershey was first, however, in dollar yield per acre.

Harold Wissler, New Holland RD1, was fourth and Andrew Stoltzfus, Elverson RD2, was fifth in corn grain yield.

In corn silage evaluation, Eli Martin, New Holland RD1, was first with an outstanding 15,296 pounds of total disgestible nutrients (TDN) per acre. Martin also had the highest dollar yield per acre.

Other corn silage winners were: Frank Yost, Narvon RD2, second, 12,906 TDN; Glenn Hershey, New Holland RD2, third, 12,232 TDN; John J. Landis, Creek Hill Road, Lancaster, fourth 11,046 TDN, and Eugene Eberly, New Holland RD2, fifth 10,848 TDN.

Certificates of Appreciation were awarded to the following for

(Continued on Page 17)

Donald Robinson, left, Garden Spot Young Farmer advisor, presents the first place corn grain evaluation contest trophy to Earl Weaver, New Holland RD1, at the Chapter's annual banquet at Blue Ball. Other top winners, from left to right, are: Frank Yost, Narvon RD2, second; Glenn Hershey, New Holland RD2, third; Harold Wissler, New Holland RD1, fourth, and Andrew Stoltzfus RD2, fifth.

Facts for Dairymen

by N. Alan Bair, Assistant County Agricultural Agent

Some Dairy Cows Unprofitable

Pennsylvania dairy farmers own some of the best milk producing cows in the world—but they also may have some of the poorest.

Penn State Extension Dairy Specialist Herbert Gilmore says that of the 700,000 milking cows in the state, it is estimated that approximately one-third do not produce enough milk or butterfat yearly to return a profit on the feed and labor they require.

A herd of uniformly good cows cannot be developed easily or quickly. But the average production of any herd can be improved gradually by effective culling, proper feeding, and careful selection of breeding stock.

And Gilmore explains that no big financial investment is needed, only careful planning and management, and a determination to have a good herd.

In order to cull, feed, and breed intelligently, dairymen must have records of production and feed consumption of every cow in their herds—year after year.

So to help dairymen develop the necessary records over a period of years, Gilmore urges them to use one of the three accepted methods of recordkeeping: the standard DHIA, the alternate AM-PM records, and the owner-sampler.

Refinancing Loans May Help Some Farmers

Many Pennsylvania farmers could reduce the high yearly interest and principal payment on loans by refinancing over a longer period of time.

Too many individuals borrow over a short time period to reduce total interest payment. This policy often reduces available capital to take advantage of good buys in farm supplies of emergency needs, explains Fred A. Hughes, Penn State University Extension farm management specialist.

Loans can be spread over a longer period with pre-payments on the principal being made when extra money is available. In the long run, less interest may be paid on borrowed funds and savings can be made on other purchases.

A larger debt load can be carried on a farm when the larger portion of a debt is a long-term mortgage rather than a short-term note or chattel, Hughes points out.

If capital is the limiting factor in improving your farm business, look into refinancing.

Low Power Voltage Can Damage Motors

A power grayout can create almost as many problems as a blackout; if your lights become dim, it is important to disconnect all electric motors. Otherwise the low voltage can burn them out. Pulling the plug is the simplest way to disconnect a motor.

However, it's easy to overlook one. Pulling the main switch does a complete job, but blacks out the house.

Most furnaces have a master switch. This should be turned off immediately to protect the motor. This also lessens the chance of an explosion when the current returns. An explosion could be caused by faulty operation of safety switches or valves. Such failure could cause the furnace to flood with oil.

(Continued on Page 22)

Several ABC members received recognition at the Blue Ball banquet Thursday night for outstanding herd averages in 1971, including: left to right, Albert E. Fry, Dale E. Hiestand and Harold L. Risser.

Among Northern Lancaster County dairymen receiving Certificates of Merit for 1971 at the ABC meeting Thursday night at Blue Ball are: left to right, David D. Zimmerman, John S. Yost, Robert R. Book, David L. Landis and Donald Eby.

ABC Honors Dairymen

Northern Lancaster County dairymen were honored for having high producing herds this past year at the eighth annual District Four meeting for Atlantic Breeders Cooperative members Thursday night at Blue Ball Fire Hall.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association (DHIA) averages were· John S Yost, Donald Eby, Dale E. Hiestand, Amos & Eleanor Hershey, Henry E Kettering, Edwin K. Wise, Albert E. Fry, Robert F & Joan B. Book, David L. Landis, Hiram S Aungst, Harold L. Risser and David D Zimmerman.

All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires.

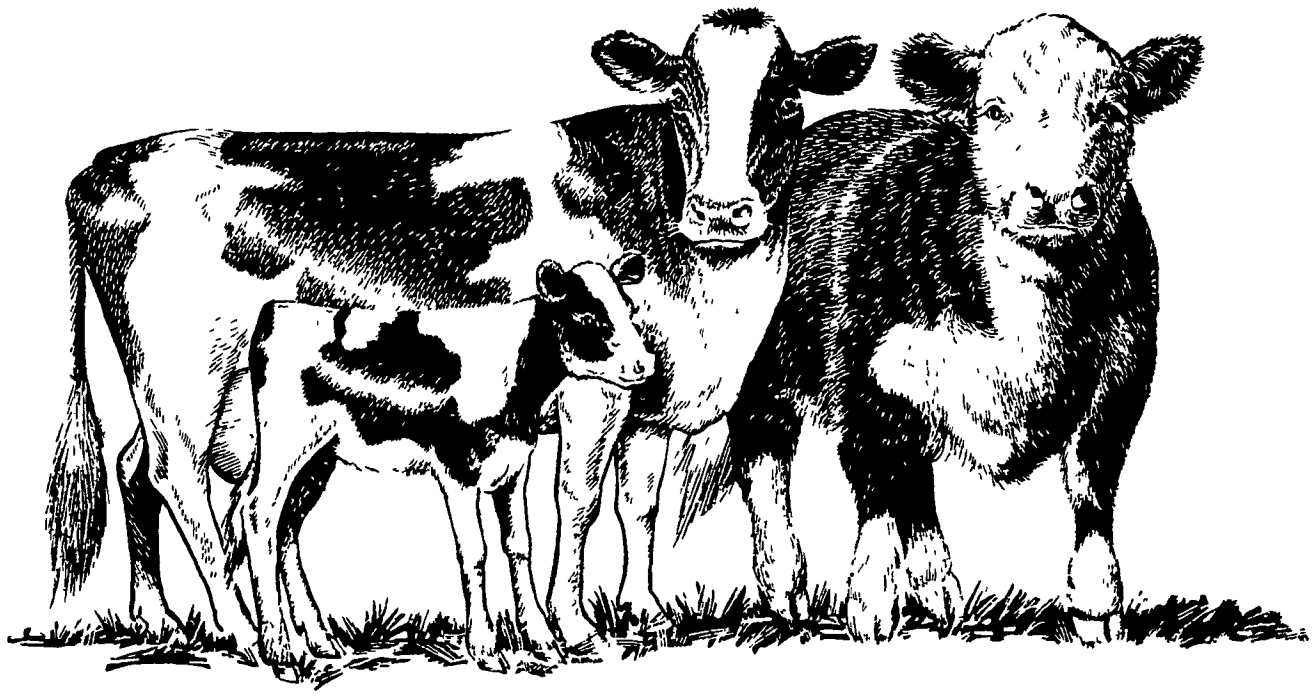
The awards were presented by Edwin Sauder, ABC Area Field Supervisor. He also used a new movie produced by Atlantic called "Program Your Herd With Mate-Rite" to show how sires can be selected to breed improved cattle that are capable of even higher production in the future.

Reports by District Director Clyde W. Martin, East Earl RD1, and David J Yoder, manager, representing the Cooperative's Lancaster headquarters, told members that 1971 was a successful business year for Atlantic. Service Technicians provided 224,730 first services and semen sales totaled $250,000, resulting in a patronage dividend of $88,300 for return to members.

Members present also voted for District representatives for the coming year. Election results will be announced later.

WHAT FEED SHOULD YOU USE?

Red Rose Has The Answer!



The Red Rose Programmed Dairy and Programmed Beef feeding systems help you decide what feeds to use and how much to use — to give the results you want.

You can increase dairy performance by fitting the feed to your roughage, and fitting this feed and roughage to cow performance. The Red Rose Dairy program shows you how to determine the pounds of feed input needed daily for milk output

The Red Rose Beef Program shows you step by step how to raise steers to market weights easier and efficiently.

These Red Rose Programmed systems can make more money for you. Call on us and let us explain how you can do it!

Dr. Honan

(Continued from Page 1)

"foresees a political hassle" on this.

Honan covered numerous other topics including the recent adoption of the Federal five-cent-per-hundred weight advertising fee in order four This program is designed to raise $2 million to $2 25 million for promotion of milk This money will be administered by a 19 to 20 member farmer committee

Honan emphasized that the success of the program depends on widespread farmer support, since farmers do have the option of getting the money refunded if they ask for it Broad-based support will be necessary if the program is to succeed, Honan said.

On the question of how the federal order relates to the state, Honan said he expects a state referendum shortly on a similar five-cent check-off. If the Pennsylvania referendum passes, another dairy farmer group will be set up to the administer the state program. Farmers in order four, however, would continue to pay the money to the federal program and would not contribute to the state program or have a vote in it.

Honan said that Inter-State Cooperative's concerns about two weeks ago" He indicated that Inter-State will now support the state referendum.

(Previous indications have been that the Pennsylvania Department of Agriculture, which last year indicated a referendum would be completed by this month, has been holding up having a referendum largely because of opposition by Inter-State and some other organizations.)

Honan said he's "glad to hear that Governor Shapp has cleared Lin Huber" this week of charges which had previously been brought by the governor against the former milk marketing board chairman. Huber was formerly a top Inter-State official.

Honan added that he's "glad to see that the Governor is beginning to change his view of what is out here on the farm."

He emphasized, however, that the Pennsylvania Milk Board has two members "completely unfamiliar" with milk marketing and administration. He said he feels these two members, which together with Huber make up the three-member Pennsylvania Milk Marketing Board, should, but probably won't, listen to Huber.

Noting that there have been many rumors recently about plans to reduce the retail price of milk to consumers in Pennsylvania, Honan predicted, "I think we will see that in some way."

Honan went on to describe the present state Milk marketing system as a "quasi-judicial" system, meaning the system is largely under the control of the Pennsylvania courts.

Honan said he is "still convinced that the present administration is determined" to remove milk marketing from this quasi-judicial structure and place it either under the control of the governor or of the Department of Agriculture. If this happens, Honan stated, "Then we as farmers might as well not have it (milk marketing)."

Honan advised farmers to keep a close watch on plans for a national milk base system. Honan expressed concern about possible consequences of such a plan to local farmers and urged them to get familiar with the proposal.

Referring to what he described as reports circulating that he personally "runs" Inter-State, Honan emphasized he doesn't, but that the Inter-State board of directors does.

He also said he sees dairying "moving toward large central control of milk." He said he sees milk pools getting bigger. He noted that the industry continues to consider evaluating milk on new elements such as protein and whey.

Also speaking was Miss Sue Kauffman, Lancaster County Dairy Princess, who urged that the next time it snows, get out the ice cream mixer and have lots of

ice cream for the next few days while you're snowed in.

Max Smith, Lancaster County ag agent, urged continued attention to good management practices including use of good herd sires, DHIA testing, good corn and quality forage practices, and attention to pesticide records and waste management.

Smith also noted the all-day Lancaster County Dairy Day program at the Farm and Home Center Tuesday, March 7.

Daniel L. Martin, District 7 Inter-State director, spoke briefly on some trends in dairying in the last 10 years showing that while Inter-State membership has dropped, volume of milk had gone up by a similar amount and output per farm has more than doubled.

Officers elected for the Donegal Local were: Luke F. Brubaker, president; Daniel S. Stoltzfus, vice president; Harold Frey Jr, Hiram S. Aungst and Albert Breneman, delegates; Leon G. Schnupp, Warren K. Witmer, and Arthur D. Wenger, alternate delegates; John M. Gingrich, secretary-treasurer, and Elvin K. Brenneman, Lancaster Market Committee.

New Lititz Local officers are: Clarence Stauffer, president; Clyde M. Buchen, vice president; Ray P. Bollinger, secretary-treasurer; Ammon Bollinger and Carl L. Martin, delegates; Ray W. Burkholder and Galen W. Crouse, alternate delegates, and Noah Kreider Jr, Lancaster Market Committee.

Millersville Local officers are: David H. McMichael, president; John H. Thomas Jr, vice president; Amos W. Breneman, secretary-treasurer; John E. Barley and Wilmer L. Shertzer, delegates; Christ Hess Jr and Andrew H. Martin, alternate delegates, and Jay E. Landis, Lancaster Market Committee.

West Lampeter Local officers are: Robert M. Mylin, president; Arthur L. Breneman, vice president; Glenn P. Book, secretary-treasurer; James D. Shertzer, delegate; J. Wilmer Conrad, alternate delegate, and J. Wade Groff, Lancaster Market Committee.

Lebanon County Local officers are: Raymond Breckbill, president; Earl K. Hostetter, vice president; John H. Hartman, secretary-treasurer; A. Ralph McCrone, delegate, and William Capp, Lancaster Market Committee.

'Good' '72 Corn Practices Reviewed

Joseph McGahan, Penn State Extension agronomist, projected another good year in 1972 for corn producers who follow proven practices.

McGahan emphasized the need to use the N type seed which has been proven to be resistant to southern corn blight.

Other suggestions included:

—Thirty inch rows show about a 10 per cent average yield increase over 40 inch rows.

—Poor weed control continues to be one of the most important causes of low yields. A four year study on weed control shows that farmers who describe their weed control as "good" averaged 136 bushels per acre, while those with "average" control had 119 bushels and those with "poor" control had 109 bushels.

—Phosphorus is an extremely important element and it's necessary to keep the level in the recommended 6.5 to 7 range.

—Nitrogen is also an important element. But farmers who use manure should take the content of the manure into account in figuring their fertilizer needs. Some farmers who were getting poor reslults were found to be applying over 600 pounds of nitrogen per acre per year through their poultry manure and "such high applications actually burn the crop."

—Farmers should "know" and not guess on what their soil yield potential is and align the potential with the proper amounts of fertilizer based on soil tests

"In spite of everything farmers have done, better hybrids make possible increased yields," acording to McGahan, a former Lancaster County ag teacher. He credited continually better hybrids as an important factor in ever-rising corn yields.

He emphasized that farmers have done many things, such as going to continuous corn instead of crop rotation, to overcome the good work of the seed producers But despite the increasing stress placed on the corn plants by modern practices, the new varieties are holding up, he said.

In spite of reports of stalk rot, he cited a study which shows that the percentage of stalk rot from varieties developed in recent years is greatly reduced from varieties which were used 10 to 30 years ago. This is true in spite of more dense plant population, and practices designed to make the corn grow faster.

McGahan's was one of several talks at the annual Lancaster County Crops and Soils Day at the Farm and Home Center Tuesday. The program was moderated by Arnold Lueck, associate Lancaster County ag agent. While attendance was down somewhat from last year, Lueck expressed satisfaction with the nearly 200 farmers who attended despite the bad weather.

A&B Buyer Gets Top 4-H Award

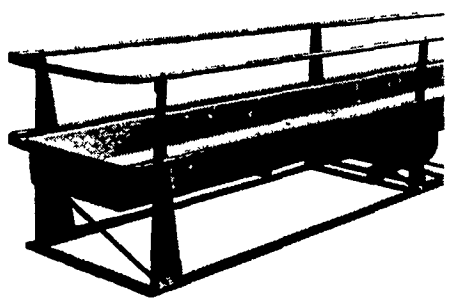
Henry Gruber, head of livestock procurement for Arbogast & Bastian, Inc., Allentown, has been named a national winner in the 4-H alumni recognition program

Gruber is one of eight former 4-H'ers who received the gold key award in 1972. He will receive the award November 29 at the National 4-H Congress in Chicago

The A&B buyer is a well known buyer of livestock at local markets and has frequently been a judge at local 4-H and FFA livestock shows

THIS AD IS ALL BUNK

THIS ONE SHAKES



Van Dale 562 Shaker Feeder

Versatility.

That's the "562." It's a feeder and bunk system all in one. It shakes a uniform feed mixture down the trough, provides its own feed bunk and has guard rails as standard equipment.

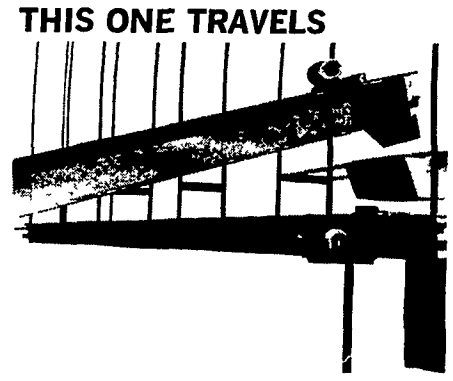
The "562" is versatile in operation too. A variable speed drive, powered through a rugged 3 hp motor, allows you to feed fast or slow. The stainless steel trough is self-cleaning and enables you to build a feed bunk from 22 to 102 feet in length. Extends to any length by using a drive unit every 102 feet.

And the unique shaking concept means you can provide an even ration mixture for any type of feed—even baled hay.

Dollar for dollar you won't find a more economical bunk-feeder combination. And, since there are no augers, chains or belts you'll find maintenance expenses are close to nothing.

That's the "562". A little money. A lot of versatile bunk.

THIS ONE TRAVELS



Van Dale SCF1400 & SCC1400 Chain Feeder and Conveyor

Workhorse.

That's the Van Dale 1400 Feeder System. It delivers up to 40 tons an hour of hard-to-feed materials. And keeps them uniformly mixed the entire length of the bunk.

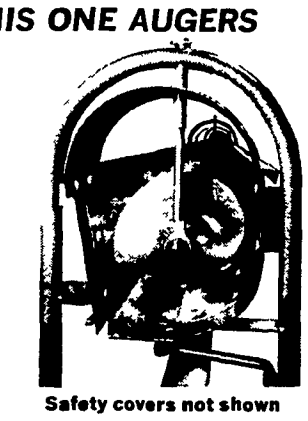
The "1400" system is designed especially for large operations. The entire unit can be suspended or floor mounted with speed and low installation costs through Van Dale's exclusive "snap-together" construction.

All galvanized metal construction means less upkeep and maintenance. The motor and drive unit remain stationary and fully shielded for maximum safety and minimum repairs.

Compare any large capacity feeder system with Van Dale. You'll choose the workhorse "1400".

Ask Your Van Dale Dealer About The New Agri-Leasing Program.

THIS ONE AUGERS



Safety covers not shown

Van Dale Mammoth 14 Multi-feeder

Efficiency.

That's the Van Dale M14. It can make your diversified livestock operation a single system. Because the M14 can feed up to four different lots at one feeding. And, each lot can receive its own special ration.

The M14 has a massive 14' trough and is fed by a bearing suspended 12' auger. It can provide you with up to 200 feet of feeding and will dump rations on either the left or right hand side. Or it can carry feed all the way to the end of the trough before dumping.

For mixing concentrated additives, the M14 auger action is unequaled. It provides consistently uniform rations all along the trough.

Selective feeding of different feed lots. High capacity feed line. Uniform feed additive mixing. That's the Van Dale M14.

Facts For

(Continued From Page 18)

If you've been away from home during a power failure and your furnace is still off, check the firebox for flooding oil residue before turning on the burner.

On some models, under special circumstances, the furnace cannot be started by the master switch. This means you should give the furnace a safety check, then push the reset button on the burner unit. If you have any questions about this, it is well to call your oil dealer, or the local concern which installed the heating equipment.

Records Program Saves Money

Several years ago the Cooperative Extension Service at Penn State University introduced an agricultural records program; farmers using the program have experienced many benefits.

First of all, they save tax dollars with the program. The savings come in the area of income and expenses; or it can come with the farmer knowing more about depreciation schedules.

At any rate, a farmer gains a better understanding of his farm business through the break-down of income and expenses.

A farmer who enrolls in the records program has the option of distributing his income and expenses to a specific enterprise—such as dairy, beef cattle, or crops. In so doing the farmer can determine whether a particular enterprise is making or costing him money.

Overall this gives a farmer a better understanding of the strong and weak points of his business.

For more information on this helpful, money-saving records program, contact our Penn State Extension Service. Farmers are urged to sign up now in order to *get the most benefit for the greater part of the year.*

Across the Editor's Desk

Editor's Note: Bob Williams, managing editor, had this to say about the current farm situation in Pennsylvania in the February 12 issue of the Pennsylvania Farmer:

Will the rural revolt against Jim McHale and the Shapp administration cost Senator Edmund Muskie the presidential nomination next summer?

The revolt is real enough. Leaders of 44 farm and allied organizations met this past month to draw a "bill of particulars" against the policies and programs of the state department of agriculture.

And at the Council of Farm Organizations annual meeting January 24 Dean Russell Larson of Penn State answered in no uncertain words the smear campaign instigated by McHale against the college of agriculture.

The Maine presidential hopeful counts heavily on Governor Shapp and Pennsylvania in his drive to become the Democrat standardbearer. And with organized labor and big city mayors in the Keystone State leaning toward Senator Hubert Humphrey, Muskie must depend on rural Pennsylvania for much of his support.

But that support is fast evaporating for Muskie as Governor Shapp's rural advisor, Jim McHale, continues to flail away publicly at Penn State, the Farm Show Commission, agricultural and rural organizations and just about anybody and everything in sight.

Mr. Shapp got the word from rural Democrat legislators at a private breakfast meeting this past month. They told the governor that their house and senate seats were in jeopardy and with them the Democrat control of the General Assembly.

The governor is reported to have told McHale to "cool it."

The state secretary of agriculture countered by canceling two research projects at Penn State the following weekend and calling a press conference the next week to show off his rural support. Strangely, none of three strictly farm organizations that showed—Pennsylvania Farmers Union, National Farmers Organization and United Dairy Farmers—are included in the 1971 list of farm organizations published this past June by McHale's own state department of agriculture.

Now the Concerned Citizens for Agriculture await their day with Governor Shapp. Membership of organizations represented on the committee total a conservative 45,000 to 50,000 farm families.

And in a rare display of cooperation, the farm and commodity organizations have been joined by farm dealer and other allied groups.

The "concern" ranges from the diversion of research funds by McHale to health and employment programs and the harrassment of country butchers by state inspectors to the management of the Farm Show complex . . . a big can of worms indeed.

The carefully structured committee represents all segments of agriculture and attempts to walk a strictly non partisan line. But this is not always possible. In an election year any accusation . . . any meeting with the governor . . . has political impact.

Little wonder that Senator Muskie's concern could well be the rural revolt in Pennsylvania and the actions of Jim McHale.

64 Southeastern Pa. Farmers See Ky. Fair

Sixty-four farmers and machinery dealers from the Southeastern Pennsylvania area were among a total of 145 farmers and dealers from across Pennsylvania who attended the seventh annual Kentucky Fair and Exposition Center at Louisville, Ky., last week.

Three local International Harvester dealers were among those sponsoring the trip to the national farm machinery show. *These men included: C. B. Hoober and C. B. Hoober Jr, of C. B. Hoober & Son,* and Bob Gantz, Elizabethtown, representing Messick Farm Equipment, Elizabethtown.

The Fair and Exposition Center is reported to be the largest showroom for farm products and machinery in the United States. The Exposition Center houses more than 350 major and short line manufacturers in a display area of nine and one-half acres.

Nearly 150,000 persons from 35 states and five foreign countries attended in 1971.

A highlight of the show was the National Farm Machinery Show Tractor Pulling Championship. Drivers competed for more than $14,000 in prize money and trophies.

Pennsylvania International Harvester dealers placed fifth in the national competition.

The adverse weather conditions caused almost as much excitement on the return trip as the show itself. Airports were closed, roads were closed.

Perhaps, in spite of all the hardships, the farmers really were concerned most about their wives, who were at home coping with lack of electricity, drifted lanes, full tanks of milk, and more cows to milk.

Say, all you Corn growers,

here's great news about better broad spectrum weed control...

Lasso® plus atrazine does the job!

That's right! Now you can tank mix liquid Lasso from Monsanto with atrazine and control about any grass or broadleaf you can think of . . . including the Foxtails, Fall Panicum, Crabgrass, Witchgrass, Cocklebur, Pigweed, Smartweed, and even Annual Morningglory is no match for Lasso plus atrazine.

Don't settle for less than maximum weed control, but don't take chances either . . . Lasso plus atrazine is safe to your *Corn* and there's no carryover problem.

For tank mix instructions about Lasso plus atrazine see Your Farm Chemical Supplier Now

Lasso plus atrazine gets the job done in all major *Northeastern* soil types—wet weather or dry. Apply it pre-emerge or preplant incorporated just once and forget it. Troublesome, yield-cutting grasses and weeds will never see the light of day.

"Harvestore high moisture corn cut our purchased feed costs in half and we now milk twice as many cows . . .

It used to cost us $800.00 per month for custom grinding and adding protein for 80 cows. Purchased feed for 160 cows is now only $400 00 per month We are getting better production and our cows are in better flesh We have just common cows but Harvestore feeds have brought our test up to 4 0% from 3 5 to 3.6%."

How to Plan Washer Purchase?

When buying an automatic washer, as with any major purchase, it pays to know what you need.

Shop carefully, comparing and weighing different aspects and costs. Collect manufacturers' literature that explains various cycles, settings and special features

After installation, it is too late to make evaluations and many a load of laundry will chug through the suds before you have the opportunity to buy again.

Decide where to put the washer. Location of the laundry equipment is strategically important, unless you are committed to a simple replacement of worn-out machinery.

Though the basement has been a traditional location for the laundry, newer and many remodeled homes place the laundry in a more convenient location — a utility room, closet, kitchen or bathroom. If there is a lot of laundry in your future, convenience will save untold steps.

There are a wide variety of washing machines available with enough cycles and water temperature combinations to handle all types of fabric and soil, and capacities for different load sizes So consider what kind of family you are the laundress for

Heavily soiled work pants, *boy's football uniforms and rough and tumble dungarees? Heavy duty cycle, pre-wash or soak* setting would be a great help.

On some washers the soak cycle will automatically continue into the wash cycle

Permanent press cycles? More and more clothing has this work-saving finish. A permanent press cycle is designed to cool the clothing before spinning to avoid unnecessary wrinkling, resulting in little or no ironing needed.

Lingerie and other delicates are happy in the washer if run through a gentle cycle.

Then there is the regular cycle which is still needed for cottons, towels and general laundry.

With the variety of fabrics, sorting is important for effective laundering results. With sorting, you may find that you have an adequate tubful here, but just a little pile there. New washers offer a choice of water levels or an extra-small load basket for small light laundry loads. This eliminates the time lost with washbasin laudering, or the need to run a machine at full capacity for a few items, or the possible damage due to lumping the specialty items with a general load.

Incidentally, if you have a very large family or one that, for some reason, zips through clothes rapidly, there are extra-large capacity washers which deserve consideration.

Many automatic washers offer time-saving specialty features. Such items as automatic dispensers for soap or detergent, bleach and fabric softener pop the laundry aids into the water at just the right time. You needn't *stand around waiting to add the extras or forget to add them. Lint* filter systems are also worth looking for.

Remember not all machines operate exactly the same way even though they offer similar features. So read the manufacturers' literature and consider each point in relation to your family needs before making a decision.

Finally, consider any condition in your home which may cause laundry problems, such a low water pressure.

A time-fill system is one in which the machine fills for a specific length of time. With a low-pressure problem, the washer will never fill properly for washing or rinsing.

A pressure-fill, however, handles this problem by filling until the correct level is reached, regardless of time.

Unless you will be using existing hookup facilities, get an installation estimate to avoid a surprise cost. Also, check power availability.

To the non-mechanically minded this may sound complicated, but a reliable dealer will be able to offer advice. And that in itself is a point. The reputation of brands and dealers is a valuable guideline.

About Spritely Gloves for Spring

Smart-looking gloves in the spring fashion parade are checked or plaid cotton, bedecked with embroidered flowers and finished with ruffled or gathered cuffs. These spring charmers in a rainbow of colors are washable, too.

A good way to wash gloves is on the hands. Dip gloved hands into a basin of warm suds and rub them clean using handwashing motions. Rinse by holding under faucet, allowing water to cascade through the open glove. Shape and air dry.

For stubborn spots, apply a suds paste or liquid detergent to wet gloves and roll up from the fingertips. Allow to set for one-half hour. Then wash, rinse and air dry.

Farm Women Societies

Society 2

Farm Women Society 2 met recently at the home of Mrs. Elva Sweigard, Manheim. Guest speaker was Mrs. J. B. Lewis, Manheim, who spoke on "Flouridation of our Waters."

Devotions were led by Mrs. Fred Hahn, Manheim.

Mrs. Elsie Witmer, vicepresident in charge of the meeting, announced that the Spring Rally will be held at Seven Springs Resort, Somerset County, on May 10. Members planning on attending should contact Mrs. Kenneth Ross, Fridens RD2, before April 8.

An Antique Auction will be held at the Farm and Home Center on Memorial Day.

A banquet is being planned by the Farm Women to be held on March 11 at Meadow Hills Restaurant starting at 6:30 p.m.

Refreshments were served by the hostess, Mrs. Sweigard and co-hostess, Mrs. Witmer.

Society 7

Farm Women Society 7 met at the home of Mrs. Charles H. Rohrer, Paradise, for the February meeting. Mrs. J. Arthur Rohrer served as cohostess.

The business meeting was led by Mrs. Martin Hersh, president. Devotions were led by Mrs. Charles Rohrer.

A report of the State Convention was given by Mrs. Carlton Homsher

The Society voted to support LARC as the County project

Also, the Society will be in charge of refreshments at the Elmer Hershey sale March 23.

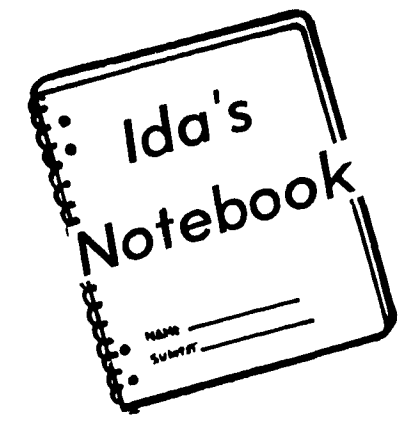
A book review on the "Lone Woman", the story of the first woman doctor in the United States, was given by Mrs. Eunice Robinson, Gap.

Society 7 will entertain Society 21 at 1 p.m. March 4 at the Leacock Presbyterian Church, Paradise. The Rev. Walter Baker, chairman of the Missions Department at the Lancaster School of the Bible and former missionary to Haiti, will show slides of his present summer work with students interning as missionaries in Haiti.

Society 30

Farm Women Society 30 held a "Sweetheart Banquet" at the Bird-in-Hand Restaurant recently. Guest speaker was Carl Kettering. Special music was provided by Mrs. Miriam Weaver.

The next meeting of the Society will be held March 20 at the home of Mrs. Sadie Horst.



Ida Risser

In a little notebook which I kept in 1933, I find listed 12 cents for a dozen eggs.

This price did not give me enough money to pay for the feed and certainly not enough for the wrist watch which I wanted so much in those days.

Another list for expenditures showed five cents for a comb, 20 cents for gifts and 50 cents for a gym blouse

Even though eggs may be three times that price, I also find that a gym blouse is now eight times that earlier price.

My father tells me a man received 40 cents a day for stripping tobacco in 1900.

But then, a pair of wooden peg shoes, which lasted a year, only cost $1 95.

Whether the prices are up or down, we seem to keep struggling to make ends meet

x x x

Sometimes the unexpected can be a boon.

A number of years ago we ordered a pair of trousers for my husband from a mail-order catalog. When the package finally arrived, it was a small thin box which contained, to our amazement, a fluorescent lamp to be installed under a kitchen cabinet. At that time, I didn't even have a cabinet.

But since the price for the two items was identical and the serial number had been transposed accidentally, we decided to keep the light and I got a cabinet to go with it

He never did get those trousers.

x x x

Have you noticed how picturesque the names of some towns are?

While studying the map of Schuylkill County, where we go for coal for our furnace, I've picked out a few names which sound better than they look — Good Springs, Lost Creek, *Ravine, Forestville, Valley View, Pine Grove, Fern Glen and Deer Lake*

However, the mountains are pretty with a light covering of snow

In the Kitchen

ONION SOUP

- 2 tbsps. margarine
- 1 tbsp. corn oil
- 3 large (2 lbs.) onions, thinly sliced
- 6 beef bouillon cubes
- 2 tsps. Worcestershire sauce
- ½ tsp. salt

Heat margarine and corn oil in a large, heavy saucepan Add sliced onions and saute over medium heat, stirring constantly, until tender and transparent Dissolve bouillon cubes in boiling water and gradually add onions. Stir in Worcestershire sauce and salt Bring mixture to a full boil, then simmer for five minutes Makes eight one-cup servings

Concerned Farmers Announce Drive to 'Redirect' Pa. Dept. of Ag

An organization representing many of the top farm organizations in Pennsylvania this week held a press conference to dramatize deep concern about programs and policies of the Pennsylvania Department of Agriculture.

The group, Concerned Citizens of Agriculture, claimed a membership including leaders from 44 farm and allied organizations These 44 organizations have a combined leadership of more than 45,000 farm families.

Among members of Concerned Citizens speaking out was J. Arthur Oberholtzer, Manheim, president of the Pennsylvania Farm Equipment Manufacturers Association.

Oberholtzer said Concerned Citizens was formed initially as "a result of things which happened the last day of Farm Show."

Specifically, it was in response to the firing by Ag Secretary James McHale of Horace Mann as Farm Show director.

Oberholtzer said that in meetings which resulted from the Mann firing and other actions, Concerned Citizens was formed with a 32 man steering committee, of which eight formed an executive committee.

The executive committee has been meeting with several key legislators on Capitol Hill and taking other action in an effort to redirect the programs of the Pennsylvania Department of Agriculture, he explained.

Oberholtzer said the executive committee has been greatly encouraged by response on Capitol Hill and by large numbers of key officials who have "told us to keep it up and don't stop, and that we're getting something done."

Action so far has included phone calls and a letter to Governor Shapp asking for an audience. Oberholtzer said there "has never been any response from the Governor, so we called a press conference to get information to the public."

In a prepared statement, Charles Mohn, chairman of Concerned Citizens, stated, "Secretary McHale refuses to listen Mr. Shapp has snubbed our phone and written requests for a meeting."

At the press conference, Oberholtzer said his concern as president of the Pennsylvania Farm Equipment Manufacturers Association and the concern of the Association is "for the very future of the Farm Show complex."

While recognizing McHale's right to fire Mann, Oberholtzer said his organization "strongly resents the fact that the advice and counsel of the Farm Show commission was ignored."

He also expressed alarm "with the proposed switch in Farm Show dates from a Monday - Friday show to a Friday - Tuesday show. Will the Commission be ignored by McHale again?"

Oberholtzer also pointed out the outstanding success of this year's Farm Show including large numbers of visitors and revenues. He stated, "Tampering by plundering politicians and tinkering by self-serving Secretaries of Agriculture is something the Farm Show Complex does not need."

He stated that Concerned Citizens "recommends an independent Farm Show commission now, perhaps structured along the lines of the Turnpike Commission. This would protect the commission from whims of future McHales and future administrations as well."

Burton L. Hetherington, manager of Berwick Vegetable Cooperative, director of the Pennsylvania Vegetable Growers' Association and president of the State Council of Farm Organizations, cited concern about the diversion of Act 298 harness racing funds for agricultural research to what he described as the rural health program at Coudersport and the Green Thumb employment program.

Heatherington explained, "We are sympathetic with the needs for improved health services and with the attempt to upgrade the lives of the rural elderly. But we feel such programs should continue in more knowledgable departments such as Health, and Labor and Industry. Why the expenditure of agriculture duplication?

"Our objection today is to the

research funds for such purposes."

SUBSCRIBE NOW

We know many of our readers regularly read a friend's or relative's copy of our publication

We don't mind We appreciate all our readers

But we wonder if everyone realizes how easy it is to receive our publication

On a yearly subscription in Lancaster County, the cost is less than four cents a week. Only $2.00 per year

On a two-year subscription in Lancaster County, it's less than three cents a week Only $3.00 for two years

Because mailing rates are higher for out-of-county subscriptions, we have to charge more But out-of-county readers can get the paper delivered every week for a yearly subscriptions which costs less than six cents a week and a two year subscription for less than five cents a week. Only $3.00 for one year and $5.00 for two years.

Think about it.

In these times of high and rising costs, we're sure you can't find a better bargain anywhere

Call us at 394-3047 or 626-2191. Or write to Lancaster Farming, P. O Box 266, Lititz, Pa. 17543.

Heatherington said Concerned Citizens is urging support of House Bill 1343 which would create a committee to spend the $400,000 annually of ag reasearch funds. The secretary of Agriculture would be only one member of the committee

Heatherington emphasized the vital importance of ag research in enabling farmers to continue to give the American family quality food at an increasingly small percentage of their take-home pay.

Also speaking was Harry R Ulrich, past president of the Pennsylvania Poultry Federation, president of the Pennsylvania Master Farmers' Association, past president of the Penn State Agriculture Advisory Council, trustee of Pennsylvania State University, member of the Pennsylvania State Egg Marketing Advisory Council and a commercial egg producer

Ulrich particularly zeroed in on the Coudersport program involving use of $90,000 of ag research funds

Ulrich stated, "We contend the Department of Health does conduct similar multi-phasic programs upon request, and should have been the government agency which conducted such a program The Department of Agriculture is not equipped for such a program, while the Department of Health is not only equipped physically, but with the staff personnel necessary to perform such tasks as called for in the project.

"We are certin the Department of Health would have conducted a project of this type if requested, and, we are just as certain that the research funds could have been used more effectively If the Department of Agriculture was equipped for such tasks, why was it forced to hire a private research organization to administer the program?

"It seems ironic to us that the Department of Health was not the government agency conducting the project, financing the program and evaluating the results But there are some other aspects of this program which make us raise our eyebrows "

Ulrich also pointed out "the apparent serious conflict of interest by the research organization performing the project "

He explained, "Dr A L. Chapman, who is director of the Research and Planning Bureau of the Pennsylvania Department of Health, is the director of the Camp Hill Research Institute We are questioning the advisability of Dr Chapman's role with the institute and at the same time drawing a salary as a state employee."

Ulrich added, "And, it is not just coincidental that John Early, the former staff member in charge of the Agricultural Research Funds projects, is the Associate Director of the Institute."

Concerned Citizens also forwarded a letter to J Shanke Cramer, Pennsylvania Attorney General, asking for an investigation of the "dual employment of Dr Chapman. Investigation was also asked on use of ag research funds to finance unemployment projects

Early Warning System from John Deere

Here's how to plant your corn with peace of mind this spring—equip your planter with an "Early Warning System" John Deere Electronic Seed Monitor.

Photocell sensors in the planter shanks are connected to indicator lamps and a buzzer. They warn you immediately, both visibly and audibly, if no seeds are coming through or if seed flow is above or below the rate you want.

The "Early Warning System" monitor may be used with most John Deere Corn Planters. Visit us soon for detailed information.

Saddle Cinches Club Meets

The Saddle Cinches 4-H Horse and Pony Club held its first meeting of the year February 18 at the home of Maragaret Keeny.

The meeting was called to order by the president, Lori Zerphy. Attending the meeting were eight members, two parents, one teen leader and two adult leaders, for a total of 13.

Under old business was discussion of the December roller skating party and the planning for a future square dance.

Under new business were: an open horse show, a Gymkana, different types of trips and activities, dues for this year which were voted at $1.

Money raising ideas for this year were also discussed, including recycling of glass and aluminum, bake sales, and a square dance.

Nominations and elections will be held next month.

Conservation Meet Reset

The Northern 4-H Soil and Water Conservation Club has rescheduled its reorganizational meeting to 7:30 p.m. Wednesday, March 1 in the Cloisterdale Farms conference room.

Cloisterdale Farm is located north of Ephrata. Take Route 222 to Messick Chevrolet, turn left on Schoeneck Road, about one-and-one-half miles to Cloisterdale's L. M. Shaffer Poultry Farm.

For more information call the leader, John Deimler, at 569-0022, or the Agricultural Extension office at 394-6851.

Everyone is invited to attend.

The program was a slide presentation on Kentucky by a member, Janice Brown, and her father.

Next meeting will be held at the home of Margaret Keeney, Manheim RD4, at 7:30 March 17.

New members are wanted and needed. We need your support. All you have to do is have a horse or pony. 4-H has a lot to offer, let it help you.

For information in the Elizabethtown area contact Mrs. Tyrus Keeney, 367-3841, or Eugene Wenger, 367-3425. For the Manheim-Mount Joy-Lititz area, contact Mrs. Kenneth Borry, 653-5016.
